DUPREES SOUND SYSTEM REQUIREMENTS

In the event the DUPREES provide the sound system, see requirements below

STAGE / PERFORMANCE AREA:

- PERFORMANCE AREA IS TO BE MINIMUM **32 FT LONG X 24 FT DEEP**
- If a stage is not available, the performance area **MUST** be sectioned off from the guests.
- If the stage at the venue is built using individual riser sections it is the clients responsibility to make sure that the performance area is stable and secure. If the performance area is not level or secure the sound system will not be set up.
- Each side of the stage is to have a clear path marked with white tape for artist's entrance and egress. If the performance area is on risers then stairs must be provided on both side of the performance area.

ELECTRIC:

- Stage **MUST** be equipped with **4 individual 20-amp circuits**. Any less may result in the artists using a smaller sound system, which will be determined by the Musical Director.
- All circuits must be on or near the performance area. If available electric is not on or near the performance area the client is required to provide and set up any available extensions before the artists arrive at the venue.
- Circuits designated for sound system **CAN NOT** be shared with any other venue or show functions (lighting, deejays, etc.)

LOAD IN:

- The client is required to insure that a clear path with no stairs is available for loading in and out of sound equipment.

PARKING REQUIREMENTS:

- The client is required to secure a parking area that will accommodate a car and a trailer for delivery of sound equipment. Parking area must be **ON SITE**.

DUPREES SOUND SYSTEM REQUIREMENTS

In the event the CLIENT provides the sound system, see requirements below:

STAGE / PERFORMANCE AREA:

- PERFORMANCE AREA IS TO BE MINIMUM **32 FT LONG X 24 FT DEEP**
- If a stage is not available, the performance area MUST be sectioned off from the guests.
- If the stage at the venue is built using individual riser sections it is the clients responsibility to make sure that the performance area is stable and secure.
- Each side of the stage is to have a clear path marked with white tape for artist's entrance and egress. If the performance area is on risers then stairs must be provided on both side of the performance area.

SOUND REQUIREMENTS:

- A professional and complete sound system with operators is to be provided.
- System is to provide full coverage of the venue without distortion or overload of any kind and able handle the mixing of all instruments and vocals clearly.
- Monitor system must be capable of providing separate mixes as per stage layout. The Duprees Musical Director MUST clear any omissions.
- The Duprees travel with [3] in-ear monitors. Sound company must be able to accommodate 3 additional mixes as listed on stage plot.
- Sound company will provide background music when the Duprees are not on stage.
- Sound company will provide ALL microphones, microphone stands and direct boxes for all back line instruments (see input list for assignments).

VOCALS

- [4] Wireless microphones will be provided for vocalists (Shure SM58 or BETA 58). All microphones must be color-coded and numbered.
- [1] vocal microphone (Shure SM 58 or Beta 58) for Conductor/Pianist (wired or wireless)
